

# <FRANK KUIPERS>

<FREELANCE FULL-STACK DEVELOPER>

## <OBJECTIVE>

Launching new products can be a risky business and I do understand that. I've seen products skyrocketing and others failing. I don't just care about a well-engineered, scalable, future-proof application, but also about your and your customer's success. Apart from drinking coffee, I enjoy implementing neat solutions for rather complex issues and finding ways to quickly generate added value to products. First concepts can't possibly represent the final product, so let's deliver a Minimum Viable Product which fits your customer's needs as quickly as possible and start your success journey.

## <SKILLS>

### Backend development

PHP, Laravel, MySQL, NodeJS, REST, C#, Linux, Docker, Kubernetes

### App development

iOS (swift), Android (Java, Kotlin), Hybrid (Angular, Cordova)

### Web development

Html, Javascript, Typescript, Angular

### Other

CI/CD, Scrum, Lean development

## <LANGUAGES>

**English**, advanced

**Dutch**, native

## <EDUCATION>

## <EXPERIENCE>

**2014 – now** | Full – Stack Developer & Founder | Engency

Lean development of Android apps, iOS apps and cloudservices. Together, we will determine a Minimum Viable Product to limit the costs and quickly deliver your product.

### Projects

- **InterimLife**, 2019 - 2020, Laravel backend, docker containers
- **CV-template**, 2017 - 2018, Laravel backend, front-end optimization
- **RaceGorilla**, 2016, 2020, Laravel backend, NodeJS, code reviews
- **FestExperience**, 2016, Laravel backend, Android app, iOS app
- **EduVine**, 2015, Laravel backend, Javascript frontend development

**Testimonial by Wouter Lenting**, founder of CV-template and co-founder of InterimLife;

*"Frank developed the backend of both CV-template and InterimLife. Both products scale well and can easily handle the thousands of daily visitors. Frank thinks along, he is alert and pleasant to work with. I highly recommend Frank to others."*

**2012 – 2019** | Software Engineer | Van Zetten Consultants

From scratch development of the cloud-application VZCtalent and iOS / Android app. The VZCtalent application is written in PHP using the Laravel framework. The application is quick, easily scalable, highly secured and automatically tested and delivered (CI/CD). The mobile app was developed using Angular, Typescript and Cordova.

**Testimonial by Jannie Niessen**, owner of Van Zetten Consultants;

*"Frank is alert, flexible and has a keen eye for details. I can focus on my job as a consultant."*

**2016** | Intern | TomTom

Research on automated benchmarking of multiple location search engines. Development of a benchmark tool written in C++ which tests search diversity, fuzziness and relevance for a dynamic set of search engines.

**2012 – 2015** | Jr. Software Developer | Skool Automatisering

Development of an iOS and Android mobile application using Sencha Touch and Javascript. Development of SkoolControl and MySkoolControl using the ExtJS framework. At last, development of the MySkoolControl PHP back-end using CodeIgniter.
